There are so many different styles of seating to choose from that it can become difficult to know what works best in your environment, this is where our Design Team come in.

Our in house Restaurant Interior Designers utilise computer aided technology for restaurant interior design and furniture space planning of restaurant schemes. We also provide a bespoke design service for items of furniture and assistance with interior colour schemes.

They are trained to understand the detailed requirements of the restaurateur and we are well placed to provide considered interior design advice to our clients, with layout designs and general product recommendations.

The next few pages will give you an insight to the style of products that we can produce but as it is bespoke everything can be adapted and created to suit your needs.

PLAIN BACK

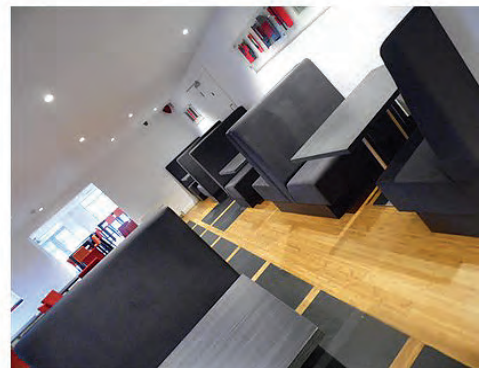

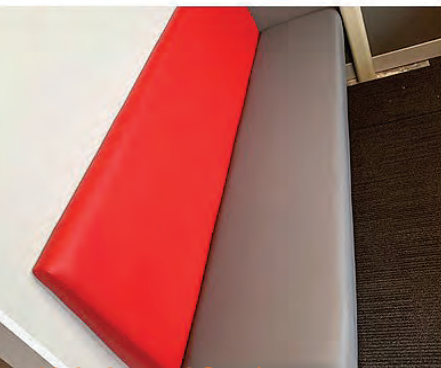

Standard Design

The classic **PLAIN** back seating style offers a clean and elegant look.

Simple and stylish suitable for any project and environments.

Using a mixture of fabrics/leathers on the seats and backs can make this design very versatile.

Mounted on plinth or wooden leg frame, available with additional headroll if required

FLUTED BACK

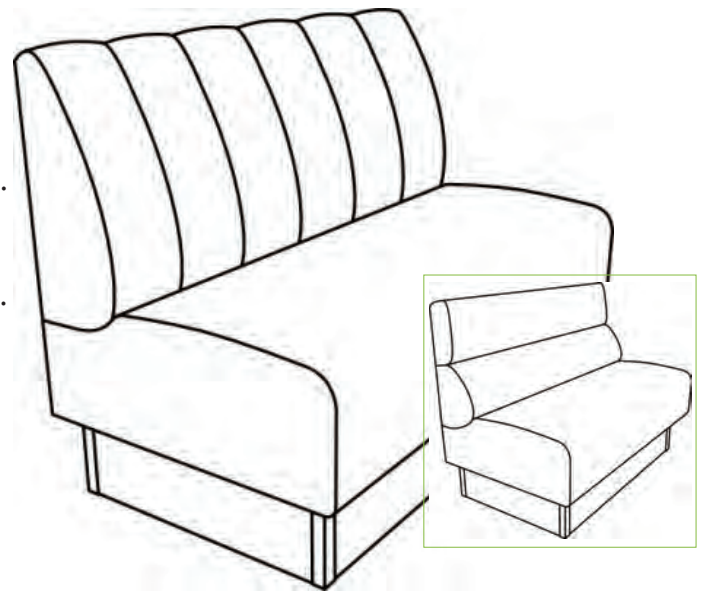

Back design No.1 (Flutes) & No. 8 (Stitched)

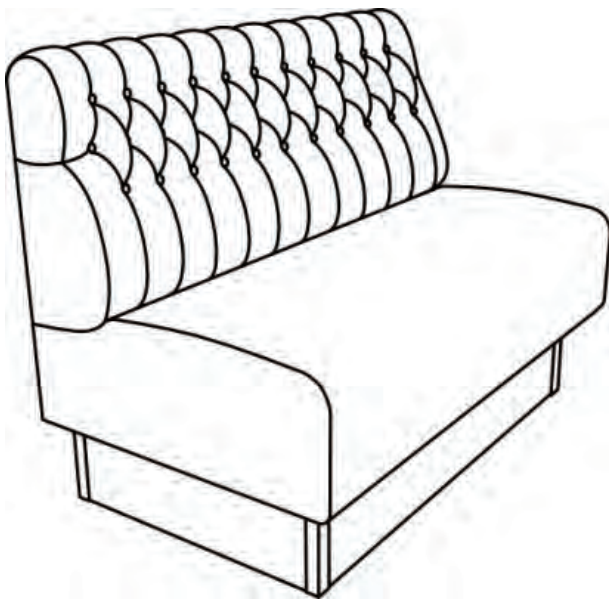

FLUTED back seating gives an added flair to any seating design.

Flutes can be horizontal or vertical and adjusted to suit individual budgets from a stitched flute or a pocket foam flutes. Quantity of horizontal flutes can be selected

The standard width is normally 150mm per flute but as our seating is bespoke it can therefore be made to your requirements.

Mounted on plinth or wooden leg frame, available with additional headroll if required

BUTTON BACK

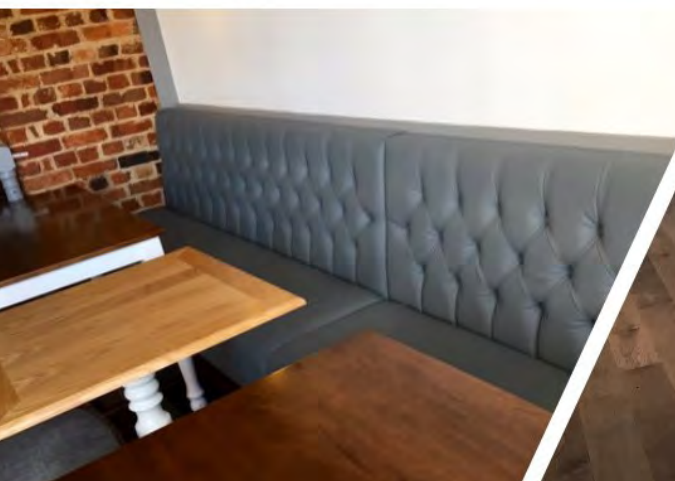

Back design No. 1

DEEP BUTTON back design, the traditional, classic and timeless look.

Adding leathers or faux leathers work extremely well on this design giving it a sophisticated and elegant finish.

You can transform the entire look of the seating by selecting from a range of button designs i.e. metal, crystal, upholstered in matching or contrasting finishes.

Mounted on plinth or wooden leg frame, available with additional headroll if required

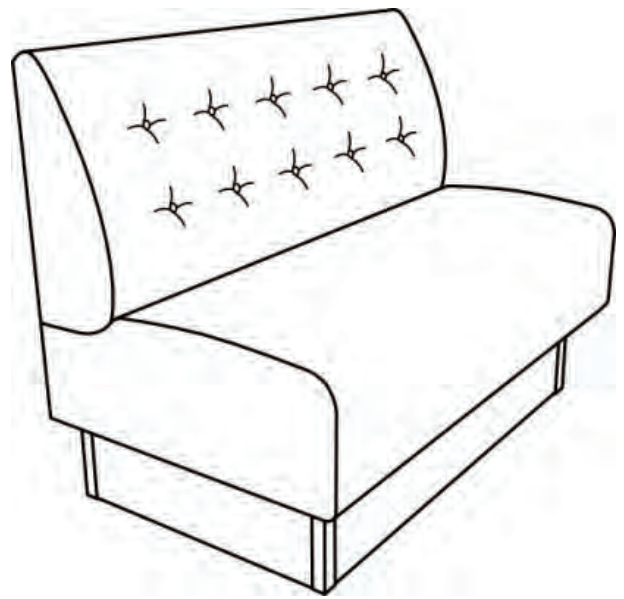

BUTTON BACK

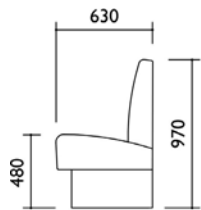

Back design No.6 (Single) & No. 9 (Double)

FLOAT BUTTON or STITCHED back seating design as per the deep button back you can select from a range of button designs i.e. metal, crystal, upholstered in matching or contrasting finishes.

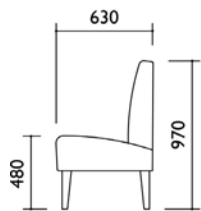

Change the entire look of float button back style by having single or double rows of buttons.

Mounted on plinth or wooden leg frame, available with additional headroll if required

THE ORIGINAL FAST FOOD UNIT designed by Primo Furniture has offered excellent value and durability for over 30 years.

The Multisystem 2000 range has been designed to reflect the increased aesthetic demand towards fixed unit seating.

The underframe is constructed from round tubular steel and features a curved table support. Rectangular and circular units complement each other to give maximum versatility within any given space. Wider top versions are also available, ideal for staff catering facilities using tray service.

N.B: RECTANGULAR TOPS ARE 600MM WIDE AS STANDARD. ALL DIMENSIONS ARE APPROXIMATE AND ISSUED AS A GUIDE ONLY

TABLE TOP DISCRIPTIONS

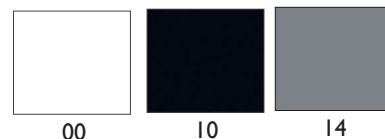

For tables from Page 40-47

Compactops are made from high pressure laminate, consisting of various layers of paper saturated with thermosetting resins and bonded through the combined action of heat and high pressure. The paper used on Compactop comes from production processes that conform with the FSC chain of custody.

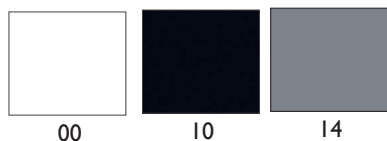

The result is a stable, non-reactive, homogenous, non-porous, antistatic, high density product, which is exceptionally tough and resistant to scratches, abrasions, chemicals and heat making them ideal for a wide range of contract applications. Available in 10mm and 12mm thick.

No specific maintenance is required other than normal cleaning. The Compactop non-porus surface can easily be cleaned and disinfected with hot water, steam and any common non-abrasive household detergents and disinfectants as long as these are not highly alkaline. AVOID strong acids and bases and avoid wiping with highly abrasive substances or equipment

COMPACTOP

IRON TOPS

Iron Tops are made from composite materials: a non-deformable water repellant multilayer wood based core, covered in steel. The slim line result is elegant, stylish and practical. The tough materials make Iron Tops suitable for indoor as well as outdoor use.

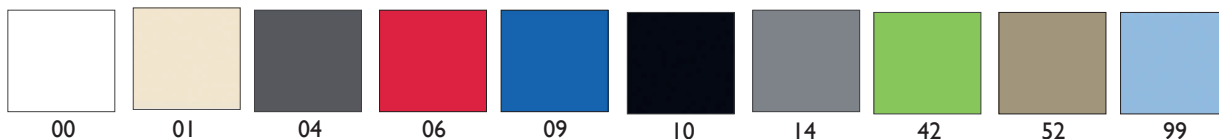

The Iron Tops do not require any special maintenance beyond cleaning. Its surface can be easily cleaned with a soft cloth dampened with water, even with household cleaning detergent provided they are not alkaline and generally aggressive. AVOID the use of strong acids or bases, avoid rubbing with abrasive substances or devices

Technopolymer Tops have high structural, heat and abrasion resistance. They are practical, shock resistant, colourful and inexpensive.

These tops are non-toxic, stain resistant, antistatic and UV-resistant and consequently have excellent resistance to atmospheric agents. All these materials are recyclable in the full respect of the Natural Environment. All the plastics are injected materials without chemicals and, as far as possible recycled pre-used technopolymers are sourced as a base raw material.

The plastic surface means they can be cleaned generally with a cloth and warm water. For the more persistant stains, a small amount of liquid soap diluted in water may be used. DO NOT use acetone, trichloroethylene, ammonia, alcoholic substances and detergents that contain even just a small amount of these substances. We also recommend avoiding all types of abrasive and solvent substances or rough sponges
